Råbyvägen 15K, Lund, Sweden

I am an engineering student in Information and Communication Technologies at **Lunds tekniska högskola**. The education is centered on giving the core engineering competences such as **mathematics, physics, and control technologies**. My program specifically has given me **competence in programming, communication technologies, computer security, and human centered design**.

I like to face new and exciting problems where I can apply the experience that I have acquired through both my studies and through real life, but I'm not afraid of "rolling up my sleeves" and facing **new and diverse problems**. Because I know that after facing hardships I emerge as a better, more experienced individual.

EDUCATION

2016 - Information and Communications Technologies, MSc Engineering Program, Lunds tekniska högskola

SKILLS

Programming	Java, SQL, PHP, UML, JavaScript, Python, HTML, CSS, \LaTeX
